

Our professionals bring decades of direct experience in the aerospace, defense, aviation, and space (ADAS) industries with a proven track record in restructuring, performance improvement, accounting, finance, and operations. We draw upon this unique combination of industry and functional expertise to guide ADAS companies and their stakeholders through challenging circumstances and maximize the outcome for our clients in the long term.

Current Challenges

- Supply chain instability
- Increased focus on environmental sustainability
- Cost inflation
- Rising interest rates
- Labor shortages
- Competitive pressures
- Government budget uncertainty
